

EXLTUBE

Our Mission: To be the leader in providing on time deliveries of competitively priced tubular products and services, which meet or exceed our customers' requirements.

MISSION

history

EXLTUBE was founded in 1981 to meet the needs of a rapidly growing mechanical and structural tubing market. Firms nationwide discovered the extraordinary strength and versatility of these products. EXLTUBE swiftly became a national supplier within the industry through our focus on product excellence, customer service, and efficiency through specialization. EXLTUBE has remained true to these core principles as we have expanded our product lines into A-53 Gr B tested pipe and specialty pipe applications.

Located in America's heartland, near the nation's second largest rail hub and easy access to the interstate system. Quick dispatch and short transit times are our specialty.

**Excellence in
Mechanical and
Structural Steel
Tubing, Tested Pipe
and Specialty Pipe**

product excellence

All EXLTUBE products are fabricated to meet or exceed strict tolerance guidelines, yields, and tensile requirements set forth by the ASTM. Intense quality controls and major mill certification of physical and chemical properties ensure high product standards and quality. Our products are cold-formed, offering significantly higher strength-to-weight ratios, greater yield and tensile strength, and improved structural integrity compared to hot-rolled structural sections. Cosmetic appearance and ease of joining makes steel tubing the preferred choice for numerous projects and applications. Our patented A-53 production process and proprietary coating technologies result in a superior A-53 product.

Mechanical Tubing

Manufactured to both ASTM A-513 and A-500 specifications. Stocked in a full range of squares, rectangles, and rounds. Available in both standard stock and custom lengths. Shipped in full truck load or rail car quantities in any combination necessary with our other products.

Structural Tubing

Manufactured to the ASTM A-500 specification. Produced and stocked in a full range of squares, rectangles, and pipe size rounds. Available in both standard stock and custom lengths. Shipped in full truck load or rail car quantities in any combination necessary with our other products.

Tested Pipe

Manufactured to both ASTM and ASME standards. Stocked in standard sizes and lengths. Available in custom lengths and wall thicknesses from rollings. Hollow inventory provides for fast turn around time on stock orders. Shipped in full truck load or rail car quantities in any combination necessary with our other products.

Specialty Pipe

Designed, specified, and manufactured in collaboration with our suppliers and premier distributors serving the needs of the oil and gas industry. Products are available from mutually agreed upon rolling cycles. Custom requirements are welcome for review and consideration.

EXLTUBE

Behind the Process

The EXLTUBE philosophy is to operate at maximum efficiency by maintaining a specialized staff that can deliver excellent products at competitive prices. In addition, an experienced management team that is responsive and prides itself on providing excellent customer service.

Service Area

EXLTUBE is centrally located in North Kansas City, Missouri. An on-site rail spur and ready access to three major interstates means timely delivery at competitive prices nationwide.
